JANE A. DOE

Unity Developer | Gameplay & Systems — FICTIONAL SAMPLE RESUME

jane.doe@example.com | github.com/jane-doe-sample | linkedin.com/in/jane-doe-sample | Springfield, USA (Remote)

SUMMARY

Fictional Unity developer with 4+ years of experience building gameplay systems, AI behaviors, and developer tools for PC and mobile games. Passionate about clean architecture, data-driven design, and creating systems that empower designers. Seeking remote opportunities in game development. (This document is a clearly fictional placeholder for demo purposes.)

TECHNICAL SKILLS

Engine: Unity (C#), Unity Editor Scripting, ScriptableObjects
Gameplay: Behavior Trees, State Machines, Character Controllers, Animation Systems
Systems: Save/Load Systems, Object Pooling, Event-Driven Architecture
Tools: Custom Editor Tools, CI/CD (Unity Cloud Build, GitHub Actions)
Other: Git, Perforce, Agile/Scrum, Code Review

EXPERIENCE

Unity Developer — Sample Pixel Studio

Mar 2022 – Present | Remote

- Built core gameplay systems for a 2D platformer using ScriptableObjects and event-driven architecture
- Implemented enemy AI with Behavior Trees; designed patrol, chase, and attack states
- Created custom editor tools for level designers, reducing iteration time by 40%
- Optimized performance: reduced load times by 50% through asset bundling and pooling

Junior Unity Developer — Example Games Co.

Jun 2020 – Feb 2022 | Springfield, USA

- Developed mobile puzzle game features: UI systems, in-app purchases, analytics integration
- Implemented save/load system with JSON serialization and cloud backup
- Collaborated with artists to integrate animations and particle effects

EDUCATION

B.S. Computer Science — Example State University, 2016 – 2020

PROJECTS

Rogue-like Prototype (Personal Project)
Procedural generation, item systems, and permadeath mechanics. ScriptableObjects for data-driven item definitions and Behavior Trees for enemy AI.

Fictional sample document — all names, companies and contact details are placeholders.
